**Hang Fung Gold and 3D-GOLD Jewellery are awarded  
“2007 - 2008 Heart to Heart Company”**

Hang Fung Gold Technology Group and its affiliate 3D-GOLD Jewellery are awarded “2007 - 2008 Heart to Heart Company” for supporting the community’s Youth Volunteer Network.

The Group has been taking the corporate social responsibility by participating in various community services. In financing the “Heart to Heart Project” which facilitates enthusiastic schools and companies to call upon their students and employees to participate, young lives can be enriched and confidence built by supporting the needy. Meanwhile, we have found that our voluntary service strengthens team spirit and promotes a sense of cohesion to the group.

In future, along with the rapid development of our business, we will continue to assume our corporate social responsibilities and foster an environment that promotes volunteerism among youth and the public, creating a caring force in our community!

### **About “Heart to Heart Project”**

In accordance with the motto “Caring for Youth, Caring for the Community”, the Hong Kong Federation of Youth Groups' (HKFYG) show young people the importance of caring for their own communities by encouraging them to volunteer. HKFYG set up Hong Kong's first youth volunteer network (VNET) in 1998 because volunteerism is about this kind of participation and citizenship. Since then, VNET has attracted more than 110,000 young people as registered volunteers and they have given 4,000,000 hours of their time in service to others. In the true spirit of volunteering they give hope to those in need and promote solidarity in their neighborhoods.
